

# Logistics & Delivery

Jankel's logistics & aftersales department manages the movement of its specialist vehicles and all supporting subsequent spare parts and equipment around the world. This department also oversees the management of the vehicle warranty, service and support of the existing fleets of vehicles in use around the world.

The department manager is highly experienced in all manner of logistical operations to the most hostile and demanding logistical environments. This invaluable experience and knowledge will offer an immediate benefit to the customer.

## Spare Parts

Jankel have developed a central stock of items that are required most often and with long lead times. This will reduce the delivery time to a minimum to keep the vehicles on the road.

## Shipments

Jankel prides itself on providing the highest quality transportation and logistics services – delivering goods on time and intact, with 24-7 support services to ensure that customers expectations are not only met but whenever possible exceeded.

Jankel have experience in transporting vehicles and equipment via air, land or sea. Whether it is to a 20' container to Nigeria or a chartered Ilyushin 76 to Kabul, Jankel have arranged the quickest and most cost effective route to some of the most difficult areas in the world.

## Support

Effective logistical services from Jankel free your resources to concentrate on core activities whilst we use our expertise to concentrate on shipment activities.

We have extensive experience working with projects and emergency shipments (large and small). Our management of shipments with timeframes spanning from 24 hours to several months have covered everything from straight forward port to port transports through to door to door deliveries which includes complex inland transport, final customs clearance and global coordination.
