

INTERNAL SECURITY SOLUTIONS FOR AN EVER-CHANGING ENVIRONMENT

For any new strategic scenario, any technical situation, any internal security operation, there's a new Jankel solution in development. And with over 200 protective solutions already in existence, you can be sure the next one is on its way.

While internal security threats change, our drive to defeat them doesn't.

In partnership with OEMs, police and special forces, we take vigilance and innovation one step further.

INNOVATIVE, FLEXIBLE, ADAPTABLE – AND PROVEN

Our aim is always the same; to improve and optimise operational capability. We make sure the solution integrates with existing vehicles, tools or systems; simply making what people drive or use, fit for the threats they face.

From small, local urban environments, to large city protection. From CBRN defence, to explosive ordnance disposal vehicles, to electronic counter measures.

Whatever the situation, Jankel's reputation for responding to the question and answering the need head on means we are the first port of call for those whose job it is to protect infrastructure, borders, cities and civilian populations.

**WHEN A THREAT
LOOMS AND A
NEW SOLUTION
IS NEEDED,
WE FIND IT.
IF THE ANSWER
DOESN'T EXIST,
WE WORK AT IT
UNTIL IT DOES**

**JANKEL HAS A RANGE
OF COUNTER TERROR
AND INTERNAL
SECURITY SOLUTIONS.**

**SECURITY SENSITIVITIES
AND CUSTOMER
PROTECTION MEAN THEY
CANNOT ALL BE LISTED.**

JANKEL

PROTECTION IS EVERYTHING

**TERRORIST
THREATS ARE
BECOMING
MORE TARGETED,
PLANNED AND
DIFFICULT TO
COUNTER...**

...FORTUNATELY,
SO ARE OUR
SOLUTIONS

For over 60 years Jankel has been using the latest technologies and working with specialist agencies to develop solutions that enable elite forces and internal security teams to counter ever-evolving terrorist threats.

PARTNERSHIP WITH JANKEL: ANOTHER ALLIANCE OF FORCES KEEPING HOMELANDS SECURE

The rise of asymmetric warfare means being alert to the next danger is ever more important. That's why our solutions, developed in partnership with special forces, police and security agencies around the world, have addressed some of the most testing threats facing the modern world.

VEHICLE-BORNE RF SAFE-STOP™: VEHICLE STOPPING SOLUTIONS THAT ARE EFFECTIVE ON THE MOVE, AT SPEED AND AT DISTANCE

A technical partnership between Jankel and Teledyne e2v brings to the market a state of the art, not-contact engine jamming system. Our integrated RF Safe-Stop™ solutions bring a flexible and mobile response for security checkpoint applications, vehicle convoy security, vehicle apprehension, harbour access control as well as fixed, mobile and marine asset protection.

The system temporarily jams the target vehicle's engine management system and while the vehicle's driver retains limited control of steering and braking, the vehicle cannot move until Safe-Stop™ is returned to passive mode.

THE GUARDIAN COUNTER TERROR ASSAULT VEHICLE (CTAV): A STEP AHEAD OF OTHER ASSAULT VEHICLES

**THE LEADING
ELEVATED
TACTICAL ASSAULT
PLATFORM, ONLY
FROM JANKEL**

Not all assault vehicles are the same. Our in-depth knowledge of armoured vehicles means our Guardian CTAV is a step ahead of others.

The CTAV offers swat teams and armoured troops a combined tactical intervention system, complete with an enhanced Patriot3 mobile adjustment ramp system (MARS). Developed on a reinforced, armoured and approved Ford F-550 base vehicle, this vehicle offers levels of assault capability, payload and operational efficiency not currently seen in the tactical ladder vehicle space.

The CTAV was developed in response to a need for a single vehicle supplied with modular equipment to face a number of different operational roles. This vehicle is currently used in high-threat situations by police forces worldwide where it is acclaimed for its protection capabilities while maintaining a discreet appearance.

HUNTER TACTICAL INTERVENTION VEHICLE (TIV): PROVIDING VERSATILITY AND PROTECTION TO INTERNAL SECURITY MISSIONS

The Jankel Hunter Tactical Intervention Vehicle is designed to fulfil a variety of roles from crowd control, tactical assault, casualty evacuation and observation. This multi-role protected vehicle is ready to face internal security, public order and counter terror missions. Based on the highly supportable Toyota, but enhanced for operational effectiveness by Jankel, the Hunter TIV offers very high protection against ballistic and blast threats while offering mobility and manoeuvrability in urban environments.
