

A large, solid orange arrow points from the left towards the text. It is positioned between the image of vehicles and the main title.

SUSTAINING CAPABILITY UNTIL LC300 SIX STEPS TO YOUR AS-NEW FLEET

A photograph of a fleet of vehicles, including several dark-colored Toyota Land Cruisers and a white vehicle in the foreground, parked in a lot. The image is partially obscured by a diagonal black line.

The LC200 has been discontinued. New and second-hand stocks are now harder to come by.

If you were not able to secure vehicles as part of our 'Act Now Armour Later' scheme, you may be wondering how to sustain your current fleet until you can introduce the LC300.

As you would expect, Jankel is busy working on the development of the LC300. We have base vehicles that we are applying our conversion expertise to, along with undertaking a full suite of testing to get this vehicle certified and field-ready. With continuously evolving demands in the protected vehicle marketplace, our engineering team are paying particular focus to reducing weight, increasing available electrical power, cyber-attack resilience, increasing payload and on easing the supportability burden.

We know that not all customers will be looking to procure and deploy the LC300 straight away. In the interim, and before the new vehicle is actively and routinely deployed, Jankel is able to offer a tested six-step process to assess the life of your current fleet and provide cost effective vehicle life extension proposals that maximise budgets in order to maintain capability for the next few years.

ALTHOUGH THE LC300 WAS LAUNCHED IN JUNE 2021, IT'S IMPORTANT TO NOT LOSE SIGHT OF SUSTAINING THE CAPABILITY OF YOUR EXISTING FLEET UNTIL THE LC300 IS WIDELY AVAILABLE

JANKEL SIX-STEP 'LIFE EXTENSION' PROCESS

AN END-TO-END AGNOSTIC SUPPORT SOLUTION

OUR SIX-STEP TAILORABLE PROCESS CAN EXTEND THE LIFE OF YOUR CURRENT FLEET BY 3-5 YEARS.

Equally applicable to Jankel and similar non-Jankel vehicles, we can regenerate, upgrade and modernise your existing vehicles to keep them working hard for you, saving time and money on unexpected maintenance and future procurement planning in the process.

Once refurbished, we continue to support with a range of maintenance contracts and services to meet all future requirements and ultimately can provide secure end of life destruction of vehicles to prevent recognition, reassembly and future use.
